PROFILE INFO

I'm looking for an interesting project and a cool team that I can join and start working on something new and useful. I hope that in the new team I will be able to grow professionally and raise my level. I'm a fast learner and not afraid of new things. My last projects, these were accounting projects, on automatic recognition and maintenance of accounting reports, and further data exchange with third-party applications.

VADYM YEVLANOV
FULL STACK DEVELOPER
